ABOUT THE MOOBUZZ BRAND

TAKE THE SCENIC ROUTE...

From John Muir to Jack Kerouac, the California coast has history of nurturing the rustic soul. A quiet fog blankets the coast at dawn, giving sight to the only ones tall enough to catch a glimpse of what is to come - the Giant Sequoias. As the morning moves on, the sea breeze then gently lifts the curtains, revealing a warm sun and delicate sky. The day begins slowly, as it has done for eons. Bees start their daily tasks, buzzing here and there, and in the distance a baby calf gently moos, nudging her mother for milk. A grape vine slowly unfurls. Effortlessly, the sun moves across the sky and starts its descent into the Pacific. Cool and refreshing, the salt infused wind settles in on the coast, as the final rays leave the California coastline and prepare for a new day.

Whimsically elegant, poetic and deliciously seductive - Moobuzz captures the very soul of the coastal California.
